Education

Cornell University, College of Arts and Sciences **Ithaca, NY**
BA in Computer Science, GPA: 3.46 Expected May 2029
Relevant Coursework: AI: Law, Ethics, and Policy | Computer System Organization | Data Structures and Functional Programming | Introduction to Machine Learning | Intro to Database Systems | Object Oriented Programming | Basic Probability | Discrete Mathematics | Introductory Microeconomics | Financial Accounting

Professional Experience

Cornell Global Research and Consulting **Ithaca, NY**
Consultant Feb 2026 - Present
- Designed a bottom-to-top communication workflow for National Alzheimer's Buddies, coordinating 50+ chapters
- Defined core metrics, built a real-time dashboard in Excel, and compiled a donor-ready narrative impact report

Widget Factory **San Francisco, CA (Remote)**
Problem Design Engineer Feb 2026 – Present
- Analyzed AI-generated solutions to coding problems by tracing code behavior, reasoning error, and classifying failure
- Evaluated 20 failures across 4 problems in Typescript, Javascript, Python, and SQL, identifying 3 categories of issues

WindyBot **Cupertino, CA**
Intern Jun 2024 - Jun 2025
- Implemented, tested, and improved a React-based AI art generation client, including the user authentication workflow
- Developed 5+ responsive art generation webpages using TypeScript, building reusable UI components across the app

Mandarin Language Cultural Center **Saratoga, CA**
Web Design Lead Aug 2022 - Jan 2025
- Led redesign of the organization's website, modernizing its interface and implementing full Chinese-language support
- Developed 100+ online lesson-plan webpages into the redesigned site, expanding the organization's digital curriculum

DGPals **Singapore**
Intern Jun 2022 - Sep 2024
- Managed a 10,000+ user community, organizing giveaways, AMAs, and fireside chats to drive community engagement
- Conducted competitor analysis of Web3 games within the Cronos ecosystem, evaluating player experiences

Personal Projects

BobaBlend — React, TypeScript, PostgreSQL, Spotify API Jul 2026
- Built a full-stack web app that analyzes compatibility between two Spotify profiles across artists, songs, and genres
- Integrated Spotify API with PostgreSQL to store and compare music data, generating compatibility scores and blends

CornellDex — React, TypeScript, Firebase Jul 2026
- Developed a Pokédex web app for Cornell students to discover and track Ithaca buildings and restaurants they visited
- Implemented ratings and reviews with Firebase, enabling users to compare their experiences with other students

Pytorch Computer Vision Projects Jun 2024
- Built deep learning models for image segmentation, chest X-ray COVID-19 detection, and facial expression recognition

Technical Skills

Languages: Java, Python, Typescript, SQL, HTML/CSS
Frameworks and Libraries: React, PyTorch
Databases: PostgreSQL, Firebase, Git
Languages: Mandarin
